Who am I

Coming from a tourism and hospitality background the transition into the galaxy of programming was the Big Bang of my life!

Investigating for frameworks && solutions is like I explore a city gazing at it's potential or as I watch the wonders of nature.

A nature's power lover && a city techs junky makes me the curious, adaptable person my friends tell me I am. Overall I'm just the master at balancing opposites!

Looking at balancing your odds?
Maybe I can be your equilibrium...
